SUMMARY

Software Engineer with 3+ years of professional experience designing and delivering enterprise platforms, ERP, e-commerce and social applications. I design composable React frontends, owned .NET services and reliable asynchronous processing with an emphasis on explicit boundaries, reusable foundations and long-term maintainability. I am also pursuing a Master's degree in Applied Information Technology at HUIT.

CORE TECHNOLOGIES

Frontend Architecture

React | TypeScript | Micro Frontend (MFE) | Feature-Sliced Design | Metadata-Driven UI

Service Boundaries

Shared Contracts | Typed Service Clients | Shared Kernel | Service Ownership | Generated Contracts

Broader Engineering

Laravel | Angular | Vue.js | gRPC | RESTful API

Backend Architecture

.NET Microservices | Clean Architecture | DDD | CQRS | API Gateway

Distributed & Platform

RabbitMQ | Idempotent Workers | SQL Server Multi-Tenancy | Azure DevOps | CI/CD

Data, Delivery & AI

Elasticsearch | PostgreSQL | MySQL | Docker | AI-Assisted Development

PROFESSIONAL EXPERIENCE

Software Engineer

01/2026 - Present

Vu Thao Technology

- Design and build a modular enterprise platform around maintainable frontend, backend and distributed-processing boundaries.
- Design the React frontend with Micro Frontend and Feature-Sliced Design, separating host, module, feature and shared-layer ownership.
- Build metadata-driven routing, navigation, permissions and module registration with generated contracts to reduce configuration drift.
- Structure .NET Microservices with Clean Architecture, DDD and CQRS across explicit Domain, Application, Infrastructure and API boundaries.
- Standardize API Gateway, shared contracts, typed service clients and shared-kernel foundations to protect service ownership and prevent cross-service data access.
- Build RabbitMQ workers for automation, document processing and notifications with idempotency, bounded concurrency and graceful shutdown; support SQL Server multi-tenancy and CI/CD quality gates.

Full-Stack Developer

03/2025 - 12/2025

COGAIN Corporation

- Delivered enterprise business systems across backend services, frontend applications, data storage and release workflows.
- Applied Clean Architecture, domain modeling, CQRS and microservices thinking to structure complex business products.
- Worked with .NET, React, SQL Server and Azure DevOps across product development workflows.
- Integrated Power BI, OpenAI and SQL Server stored procedures for internal business systems.
- Built reusable components and refactored shared backend/frontend foundations for maintainability.

Full-Stack Developer

04/2023 - 03/2025

GOSOFT Technology Company Limited

- Delivered e-commerce, ERP and social network software across database, API and web admin layers.
- Built reusable menu packages, base components and internal code-generation tooling.
- Worked with maintainability-focused enterprise software domains where business clarity and extensibility mattered.
- Guided new team members, reviewed code and collaborated through Agile/Scrum workflows.

EDUCATION

MSc in Applied Information Technology Ho Chi Minh City University of Industry and Trade (HUIT) Academic track focused on applied information technology.	01/2025 - Present	Information Technology Engineer Ho Chi Minh City University of Industry and Trade (HUIT) Software Technology specialization	01/2024 - 06/2024	Bachelor of Information Technology Ho Chi Minh City University of Industry and Trade (HUIT) Software Technology specialization	09/2020 - 12/2023

AWARDS & COMPETITIONS

IT Faculty Scientific Research Competition, Academic Year 2025-2026 Encouragement Award · Student Co-supervisor Ho Chi Minh City University of Industry and Trade (HUIT)	04/2026	University-level Student Scientific Research Competition, Academic Year 2023-2024 First Prize · Team Leader Ho Chi Minh City University of Industry and Trade (HUIT)	05/2024
Faculty-level Student Scientific Research Competition, Academic Year 2023-2024 Second Prize · Team Leader Ho Chi Minh City University of Industry and Trade (HUIT)	04/2024	Information Technology Talent Search 2023 - Website Applications Consolation Prize · Team Leader Ho Chi Minh City University of Technology (HUTECH)	12/2023
Faculty-level Student Scientific Research Competition, Academic Year 2022-2023 First Prize · Team Leader Ho Chi Minh City University of Industry and Trade (HUIT)	04/2023	IT Innovation and Talent Search in the Digital Era Second Prize · Team Leader Ho Chi Minh City University of Industry and Trade (HUIT)	06/2022

RESEARCH PROJECTS

University Research Project - CL-HUIM on Dynamic Transaction Databases with Negative Utility In Progress · Principal Investigator Ho Chi Minh City University of Industry and Trade (HUIT)	07/2025-06/2026	University Research Project - Aspect-based Sentiment Analysis with Knowledge Graphs In Progress · Core Member Ho Chi Minh City University of Industry and Trade (HUIT)	01/2025-12/2025
University Research Project - Graduation Thesis Progress Management Score: 80/100 - Good · Principal Investigator Ho Chi Minh City University of Industry and Trade (HUIT)	12/2022-06/2023
